Kids ATYRAU UNIVERSITY

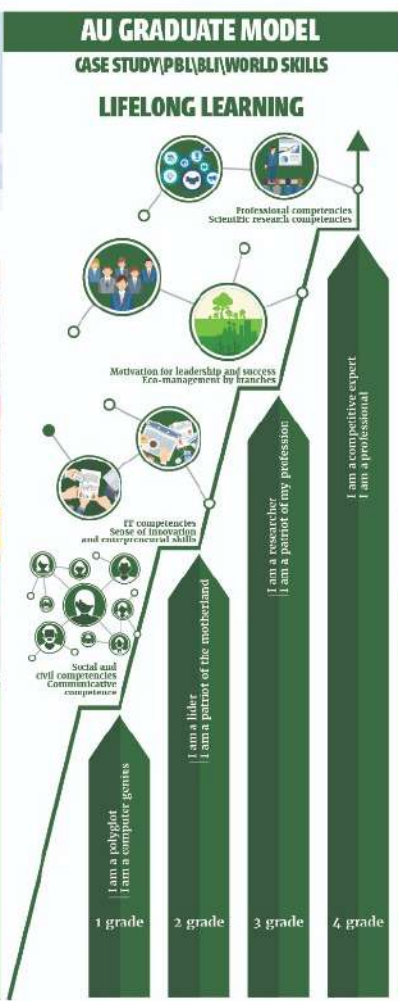

A unique project for Kazakhstan, demonstrating the availability of university education for young people. It helps to develop curiosity in children, offering an original educational methodology that is different from the usual schooling, based on increasing experimentation, visibility, interactivity and mass participation.

School for boys USTAZ, which has no analogues in the Republic of Kazakhstan

The three-tier education system
School Undergraduate Master

EXCHANGE PROGRAMS FOR STUDENTS AND TEACHING STAFF

- Exchange program of the Ministry of Education and Science of the Republic of Kazakhstan
- ORHUN
- MEVLANA
- ERASMUS+
- Mobility UNDER BILATERAL AGREEMENTS

ECO CAMPUS

Growing a Culture of Sustainability

AU is the first higher education institution in Kazakhstan to implement sustainable development initiatives in its strategy. Eco-campus development program is a complex process that incorporates ecological management, green technologies, scientific research projects, international collaboration in education for sustainable development, and youth involvement.

The Eco-campus development program serves as an innovative guide to articulate a structure, which has challenged the university community to commit to sustainability. As the benchmark for our development program the university participated in the 2020 UI GreenMetric ranking and was ranked number 566.

- Projects
- Smart energy tree
 - Solar gazebo
 - Wastewater treatment plant
 - Winter garden
 - GreenWay volunteering club
 - Center for Lifelong learning for sustainable development
