

In the SWAPTELASU scientific laboratory, familiarization and training events are held, for example:

Passing a month-long internship and familiarization with technical and fire safety, training in working with existing devices (Electric distillers PE-2205, PE-2210, PE-2220, drying cabinet ShS-80-01MK SPU, muffle furnace SNOL-6, pH meter "SevenExcellence" METTLER TOLEDO) 2nd year students (2 people) of the specialty "Biology and Agriculture" of the Faculty of Natural and Agricultural Sciences, Atyrau University named after Kh. Dosmukhamedov

June 2, 2021 After the internship of students in the laboratory "Ecology", they introduced and trained 2nd year students (8 people) of the specialty "Chemical Analysis and Expertise" and the 1st student of the specialty "Chemical Technology of Hydrocarbons" of Atyrau University named after Kh. ShS-80-01MK SPU, muffle furnace SNOL-6)

October 25, 2021.

Conducted familiarization and training of students of the 3rd year (11 people) of the specialty "Applied Ecology" and a teacher of the Department of Ecology of Atyrau University to work with devices (drying cabinet ShS-80-01MK SPU, muffle furnace SNOL-6) with students of our university.

. On October 26, students of the 4th year (8 people) of the specialty "Applied Ecology" and a teacher of the Department of Ecology of Atyrau University named after Kh. Dosmukhamedov were introduced and trained.

On October 27, a practical lesson was held for 7 students of the 4th year of the Russian department of the specialty "Applied Ecology" and a teacher of the Department of Ecology of Atyrau University named after Kh. Dosmukhamedov.

November 2, 2021 Conducted acquaintance with the students of the Nazarbayev Intellectual School of Chemistry and Biology.
